ESSLINGEN

AN IDEAL PLACE TO STUDY

The city of **Esslingen** has a population of over 93,000 inhabitants, and lies nestled in the vineyards overlooking the Neckar valley. Stuttgart, the capital city of Baden-Wuerttemberg, is only 20 kilometres away.

Near the university, there are many hiking paths through the vineyards and forests that can be explored on foot, by bicycle or segway. Within the city, there are many parks, the city castle, waterways, street cafés and theatres. In the winter, the old city centre lights up with a Christmas market; in the summer, live music, open-air cinemas and artisan's markets make Esslingen come to life. Esslingen's historical city centre, with its half-timbered houses, its cafés and its diverse cultural life, is an ideal surrounding for a successful study time.

Esslingen has a history reaching back over 1,200 years, a history in which tradition and progress have gone hand in hand. Since its industrialisation, Esslingen has been a major centre for engineering education, and it is this mixture of technical prowess and cultural tradition that makes Esslingen an ideal place to study.

HOW TO APPLY

Esslingen University of Applied Sciences
Flandernstrasse 101
73732 Esslingen
GERMANY
Phone +49(0)711 397–44 74
mengasm@hs-esslingen.de

Admission Requirements

- Vehicle Sytems Major: Bachelor of Automotive Engineering, Mechanical Engineering , Mechatronics or equivalent
- Automotive IT Major: Bachelor of Information Technology, Electrical Engineering or equivalent

- APS required from bachelor graduates of China, India, Mongolia and Vietnam
- English language test

APPLY NOW!

Application deadline 31 March

Design und Satz: www.weiser-design.de Stand: November 2021

HOCHSCHULE ESSLINGEN

AUTOMOTIVE SYSTEMS

Master of Engineering

M

BUILD YOUR CAREER IN AUTOMOTIVE SYSTEMS

Automotive Systems (ASM) students choose one of two majors:

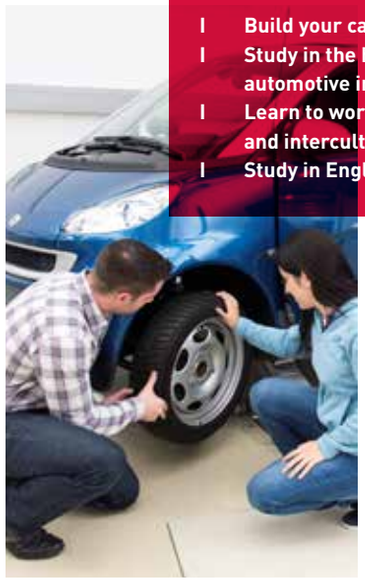

- Vehicle Systems
- Automotive IT

Vehicle Systemss graduates aim to work in the field of development and testing of innovative functions to improve ride & handling, stability, driveability and fuel economy.

Automotive IT graduates aim to work in the field of development, market launch and supervision of innovative car communication systems and safe software. They can develop bus- and communication systems and safety concepts for vehicle systems.

MASTER OF ENGINEERING

- **Build your career in automotive systems**
- **Study in the heart of the European automotive industry**
- **Learn to work in an interdisciplinary and intercultural environment**
- **Study in English – live in Germany**

STUDY IN THE HEART OF THE EUROPEAN AUTOMOTIVE INDUSTRY

As the university is located in the very heart of the automotive industry, students benefit greatly from the close links to the technological and industrial leaders situated in the area, such as **Bosch, Daimler, Audi, Festo, and Porsche**. These are especially important when it comes to master's thesis placement.

Learn to work in an interdisciplinary and intercultural environment

ASM students have the possibility to work on projects that have been commissioned by the industry. One example is the Electro-Hybrid Bus, the first of its kind in the world. This bus, which showed Esslingen to be a pioneer in electro-hybrid technology, is running in the streets of Esslingen today and has been commissioned by other European cities.

MASTER OF ENGINEERING AUTOMOTIVE SYSTEMS

Master's Thesis	3rd SEM	Soft Skills for Engineers
Major in Vehicle Systems Ride and Handling: Handling, Suspension Modeling. Propulsion Systems,, Engine Control Systems	2nd SEM	Autonomous Systems
Major in Automotive IT Automotive Communications: Wireless and Wired Onboard and Offboard Communication Systems, Man-Machine-Interactions (MMI).Safety and Security, Usability & Dependability		Team Project
Mathematical Methods in Engineering: Numerical Analysis, Numerical Differential Equations	1st SEM	IT Fundamentals, Vehicle System Fundementals
System Design: Automotive Systems and Software Architectures, Automotive Systems Development Process and System Test		
Simulation and Control 1: Basic Control, Advanced Control, Lab Simulation and Control		

German language and culture program in September.
